Diplômes d'Université

Date de mise en ligne : vendredi 25 janvier 2013
Study for a "Diplôme d'Université" et the Observatoire de Paris:
Four "Diplômes d'Université" (DU) in Astronomy and Astrophysics are proposed:
two for "face to face" training on the site of the Observatoire de Paris
two for distance training tutored by researcher-teachers

Face to face DU

"Explore and Understand the Universe"
At the level of the licence L1, this diploma targets anyone wishing to acquire a wide spectrum of knowledge about current research via direct contact with astronomers. It is composed of 90 hours of lectures, practical work, tutoring and talks, an observational internship at the Observatoire de Haute Provence and image analysis at Meudon.

"Structure of the Universe"
Reserved for students who have passed the first year; it includes talks and the composition of a short thesis under the direction of a researcher.

Distance learning DU

"Window on the Universe"
This unit, at the level of the Licence (L2, L3) or Master (M1) depending on the academic path followed, involves the equivalent of 160 hours of lectures and targets students and also professionals who already have a university background in physics.

"Astronomy and celestial mechanics"
This online DU, representing 80 hours of courses, targets members of the public who have done science up to their final year at school.

Course on the study of light. Practical work: making a spectrograph
