

# Asking for an advisor from the Observatory...

Date de mise en ligne : mardi 19 février 2013

## **Description :**

Aide et formation pour développer un projet pédagogique centré sur l'astronomie

---

**Observatoire de Paris - PSL Centre de recherche en astronomie et  
astrophysique**

---

**Any teacher who desires to implement in his class or school a pedagogical project related to astronomy can ask for the help of an advisor.**

Advisors from the Observatoire have at their disposal pedagogical "suitcases"; they can give scientific help and advice either directly at school or by telephone or email. .

**Mallette pédagogique "Système Solaire" UFE - Observatoire de Paris**

Teachers' projects can take many forms : "hands-on" activities (for example, model making, instrumentation...), talks, mini-exhibitions...

The advisorship can include a free visit of the Observatory, his own participation in a school activity (a talk, a question and answer session, a workshop), or an introduction to celestial observing. In the latter case, the astronomer will bring a small instrument to observe the Sun or the stars at night.
